

Building on quality

Low HAV Plate Compactors

Plate compactors with very low Hand-Arm Vibrations. For compaction of sub-bases and asphalt these plates maintain productivity without exposing operators to excessive harmful vibrations.

Low Hand-Arm Vibrations

- The advantages of a lightweight plate with the features of a heavyweight
- Very low vibration levels without the additional weight
- Double mounted, mass plate anti-vibration system
- Total engine protection frame
- Optional paving mat and transport wheels available
