Pneumatic Pokers

Powerful pneumatic pokers work at high frequencies allowing operator to vibrate large areas quickly. When a compressor is available on site these pokers are the perfect solution.

High Frequency Output

- High Frequency, High productivity
- All parts made from heat treated abrasion resistant steel
- Two part 'in head' motor, reliable performance
- Only one wear part, easy maintenance
- In line oiler, helps avoid internal corrosion and seizing
- Twist grip throttle, convenient control
- Quick release coupling

2m of hose supplied as standard, longer hose lengths can be factory fitted.
Rubber nose caps available to avoid damage to the shuttering internal surfaces.
