

Building on quality

VH500 Submersible Hydraulic Pump

A submersible with a difference. VH500 powered by your hydraulic power pack or plant hydraulic PTO.

Hydraulic Power

- All the advantages of a submersible without being electric
- Extremely low maintenance
- VH500 2" Output, accepts standard hoses
- No priming required
- No sparks
- No smell
- Reliable, the pumps can left running unattended for extended periods

GOODENOUGH PUMPS

VH500 the pump comes complete with it's own quick release flat faced hydraulic couplings so it can be put to work fast either from its own power pack or other hydraulic source i.e. landrover, tractor, excavator or other mobile power source The pump is suitable for pumping water with up to 5mm solids in suspension. Both impeller and impeller bowl are polyurethane coated to extend their working life
